Colin says,  
 "After every number that is  
 9 the tens change."

Always true?

Never true?

Sometimes  
 true?

Convince Coco that the pattern  
 of the numbers from 20 to 30 is  
 the same as the pattern of the  
 numbers from 50 to 60

Put a digit in each box to make the statements true:

If you keep counting  
 from this number...

1

...you will say  
this number:

10

1

28

2

68

1

7

7

2

11

Is there only one way to solve this problem?

Can you do it using the digits 0, 1, 2, 3, 4, 5, 6, 7,  
 8, and 9 once each?
